Dear Hiring Manager,

I would like to express my interest in the position of an Associate Game & Level Designer at Nyamakop. I am a highly motivated ,hardworking and very eager individual. I strive to always do my best in whatever task is placed before me.

I enjoy playing video games and creating them. The very first game I played was Mario Bros as a child and was captivated by it. I've always been fascinated by how games are made. I've always dreamed of being a part of a games studio. My journey in game development started when I downloaded Unity and blender and started learning the engine and 3d modeling. I spent all my free time and weekends working on my game and learning new skills. There is nothing more satisfying than seeing something you work on finally take shape.

I have included a working prototype. As I believe that is the strongest portfolio. The prototype will display my level of skill in various aspects of game design and development such as level design, Basic AI, Combat and many aspects of game design. My ability to do and understanding the various aspects of game design allow me to combine them into an experience. If you have any questions regarding the prototype please feel free to ask.

I am confident that I would be a beneficial addition to Nyamakop.

Thank you for your time and consideration.

Sincerely,

Ziyaad Johnson
